

Rishi Prakash Mohapatra

Software Developer | Full Stack Engineer | Python Developer | AI Solutions Builder

+91 8178211255 | mohapatrarishiprakash@gmail.com | Chennai, Tamil Nadu, India | [linkedin.com/in/rishi-prakash-mohapatra-55b3a82b0](https://www.linkedin.com/in/rishi-prakash-mohapatra-55b3a82b0)

PROFESSIONAL SUMMARY

Results-driven software developer with hands-on experience architecting full-stack applications, AI-powered systems, and client-facing web solutions. Proficient across the complete development lifecycle—from FastAPI/Python backend design to React.js-driven interfaces—with applied exposure to machine learning, computer vision, and scalable database systems. Recognized innovator (Inspire Award MANAK, Govt. of India) and hackathon participant delivering production-grade software that addresses real-world challenges.

PROJECTS

Placement Advisor — AI-Powered Recruitment Platform

Python · FastAPI · React.js · MongoDB · Tailwind CSS

- Architected end-to-end full-stack platform with AI-driven candidate-job matching, resume analysis, and dual dashboards (recruiter & applicant).
- Engineered RESTful API layer with FastAPI, designed MongoDB schema, and implemented role-based authentication for secure multi-user workflows.
- Delivered intelligent job recommendation engine that reduces manual screening effort and improves match precision.

Time Tracker Pro — Productivity Analytics Platform

Python · Java · SQLite

- Built cross-platform productivity tool with session tracking, goal management, and automated weekly performance reports.
- Designed SQLite data pipeline aggregating session logs into actionable dashboards and time-management insights.

Prativimbh — AI-Based Air Writing System

Computer Vision · Gesture Recognition · Python

- Designed real-time fingertip-tracking system for air-based digital writing, positioning it as an accessible alternative to smart boards in education.
- Implemented computer vision pipeline achieving robust gesture capture under varied lighting and background conditions.

AI-Driven Life Cycle Assessment — Sustainable Mining Tool

Machine Learning · Deep Learning · Data Visualization

- Developed predictive ML framework for the metallurgy sector to forecast environmental lifecycle impact, optimize resources, and detect operational anomalies.
- Integrated visualization layer communicating sustainability KPIs to non-technical stakeholders for data-driven decisions.

University Management System

C++ · Object-Oriented Programming · File Handling

- Engineered modular C++ academic system managing student records and administrative workflows via OOP principles and persistent file I/O.

EXPERIENCE

Freelance Web Developer

Client-Based Projects | 2023 – Present

- Delivered responsive, production-ready websites by translating client business requirements into functional full-stack solutions.
- Implemented custom UI components, third-party API integrations, and performance-optimized frontend architectures across multiple client domains.

TECHNICAL SKILLS

Languages	Python, C++, C, Java (Basic)
Frontend	React.js, JS, HTML, CSS
Backend	FastAPI, REST APIs
Databases	MongoDB, SQL, SQLite
AI / ML	Computer Vision, Gesture Recognition,
Tools	GitHub, VS Code, Linux, Kali Linux
CS Concepts	DSA, OOP, DBMS, SDLC
Security	Ethical Hacking Fundamentals

EDUCATION

B.Tech — Computer Science & Engineering SRM Institute of Science & Technology, Chennai | Expected 2028

Higher Secondary (Class XII) Modern Delhi International School | 76%

Secondary (Class X) Kendriya Vidyalaya No. 1, Jammu | 85%

ACHIEVEMENTS

- Inspire Award MANAK** — Govt. of India recognition for innovative student-led scientific project.
- Smart India Hackathon (SIH)** — Advanced to internal round; built a national-level problem solution.
- NXT Gen Annual Hackathon** — Competed in multi-discipline technical & innovation contest.
- GeeksforGeeks Coding Contests** — Active competitive programming participant.

CERTIFICATIONS

- IBM SkillsBuild — Artificial Intelligence
- HackerRank — Python (Basic)
- HackerRank — Problem Solving (Basic)

LEADERSHIP & ACTIVITIES

- Core Team** — Texus 2026 Annual Cultural & Technical Fest; co-ordinated operations for 1,000+ attendees.
- Member** — GeeksforGeeks Student Chapter; contributes to coding workshops and peer knowledge sessions.

VOLUNTEERING

- Active contributor to an **Animal Protection NGO**; drives community outreach and welfare campaigns.
